PRODUCT CATALOGUE 2023 - 2024

MODIFORM HORIZON 2025

OPEN AND TRANSPARENT COLLABORATION

Our sector is constantly in motion, with challenges presenting themselves in fast succession. We are aware that we have all had to demonstrate agility and flexibility when faced with factors we were not always able to control. Together, we were able to respond swiftly to these challenges and to constantly adapt our business operations to demand. We believe it is important to communicate openly and transparently about the impact of developments. And we will continue to do everything we can, along with all our customers and partners, to achieve the best results. Economic results that simultaneously contribute to the sustainability of the sector. Together, we look ahead to the possibilities. Because every decision we make and every product we offer will go towards fulfilling our Horizon2025 ambition. And there is no going back on this ambition as far as we are concerned.

NATURALLY SUSTAINABLE CHOICES

As you have come to expect from us, you automatically make the most sustainable choice when you choose our products. We ensure that you automatically help to protect the environment. Take our Pristine trays, for example, which are made of 100% recycled polystyrene (PS) without dye additives. This is a good example of a successful and sustainable transition embraced by the market. Or take the returns systems, in which we offer a competitive payment for returned trays, so that we can process them in-house again to create new products. Or consider the use of stronger products that make it possible for trays to be reused multiple times. This saves on the amount of plastic used and on transport movements. Or the development of lighter products offering the same quality. These, too, lead to savings that benefit the environment. Every time we develop a product, we fully consider its impact on the environment. This gives you complete peace of mind, as each product is naturally sustainable!

FOCUS ON PRODUCT RANGE

Whether packs, online packaging, transport trays, ecoExpert products, propagation trays, or indoor farming trays: our catalogue features new, familiar, and improved products. One of them is the R&R pots that contain no carbon black and are 100% recyclable. Another is the single-use and multiple-use trays, with a whole new range of paper plug trays. We have even developed a special tray for growing young cyclamen together with our Italian customer Lazzeri. Modiform's recyclable PS cool grey packs and PET transparent green packs are made of 100% recycled material and are easily recyclable. We have had this approved by independent institutes, Cyclos and OPRL, so that the packs can be discarded via consumer waste streams and recycled again! Lastly, we also like to highlight our Root Barrier: a unique and innovative coating layer (also recyclable, of course), which prevents root adhesion. This reduces damage and product loss during cultivation, automatic sorting, and distribution.

LOOKING FORWARD TO A SUCCESSFUL SEASON

We look forward to the new season with confidence and optimism, a season in which we enjoy working together and continue communicating with one another openly and honestly. A season in which you can continue to rely on our service!

On behalf of the Modiform team,

John van der Maarel,
Sales Director

DISCLAIMER

The items shown in this catalogue are a selection from our range. For information on which items are available from stock, please contact Sales Support. We do our utmost to ensure that we have sufficient products in stock, and aim to deliver them as quickly as possible.

We use as much recycled material as possible for our products, as a result of which the colours may sometimes vary. The colours presented in the catalogue may differ from the actual colours.

MODIFORM

RECYCLED AND RECYCLABLE OUR AIM

We always strive to use materials made of recycled materials, which are in turn recyclable after use. For our thermoformed and injection moulding pots, this means that our R&R series consists entirely of pots containing 100% PP plastic, which are fully recyclable after use. Trays are made of recycled PS; our trays are made of PS without any dye additives. We make every effort to recover the trays, so that we can recycle them again in-house. For our packs, we choose recycled transparent green PET or cool grey PS, as these are the recyclable alternatives to black packs. It is a choice that makes sense, right? Lastly, we make the ecoExpert products from recycled cardboard waste. After use, businesses and consumers can dispose of these products as waste paper, so that they can be sent off for recycling. By choosing these products, you automatically make the most sustainable choice. We cannot make it any easier!

MODIFORM HORIZON 2025

INNOVATIVE COOPERATION FOR THE BEST POSSIBLE RESULTS

It goes without saying that Modiform is constantly looking for ways to cooperate with our customers. But we also want to work together with other partners, as only together can we achieve the best possible results. As in nature, every step taken in our supply chain is interconnected. For instance, amendments to the laws and regulations on recycling has consequences for everyone. We keep a close eye on all developments and factor them into your and our daily operations. Every detail counts. In every step we take, from initial idea to final product, we consider ways to optimise both business and sustainability. We do this in-house by pursuing further automation, with a specific focus on what works best for our customers. And we do so with an unwavering optimism, an open mind, and transparent communication.

FUTURE-PROOF

We cannot sit back and do nothing. If we want to ensure a liveable future for ourselves and – more importantly – our children, grandchildren, and great-grandchildren, we need to take smart steps forward together every day. Together, we can help to protect the environment – we are absolutely sure of that!

HOW?

Of course, it starts with the ‘bigger picture’. Our Horizon2025 sets out a firm ambition, which we translate into ‘smaller pictures’ every day. This could be by developing sustainable products that are perfectly aligned with your requirements, or by making recyclable packs, reusable trays, and returnable trays. The latter has true value, as every returned tray can be re-used to produce new trays. With that in mind, it is only fair that you get a payment in return! This not only allows us to produce new, plastic-free products, but also lets you do your bit.

EVEN SMARTER TOGETHER

How great is it when good ideas are turned into tangible products? We are eager to work together to produce, develop, and test ideas. We keep testing these ideas until they work optimally, and we are keen to share that success with others. There are always sustainable solutions: let us sit down together and discuss them. Please contact our Sales Support for more information.

‘SUSTAINABLE DOES NOT AUTOMATICALLY MEAN EXPENSIVE!’

We will always come up with and produce products that add value in an environmental and business sense. Because you can achieve both at the same time! We are

always looking for sustainable solutions for cultivation, transport, and packaging systems. The last few years have seen many steps in the right direction – there are countless examples. We have everything in-house, from granulate production to product recycling, which has enabled us to rapidly make our operations sustainable. Even if you do nothing, you do your bit by using Modiform’s products!

‘NATURALLY SUSTAINABLE’

WORKING TOWARDS HORIZON2025 TOGETHER

2025 is fast approaching. Together with our ecosystem of customers and partners, we aim to kick out virgin plastic by 2025. This applies to our own production and business operations as well as to the entire supply chain. We want the horticulture sector to become the first supply chain that is free of fossil-based virgin materials. And to achieve that, we have taken big and small steps in recent years. For instance, we are transitioning to CO2-neutral production by using only green electricity, and we will at some point only make products that do not require the use of virgin plastic. We have made great strides to recycle 100% of our products and recover an additional 20% for recycling.

We cannot sit back and do nothing! Together, we will make sure the sector is future-proof.

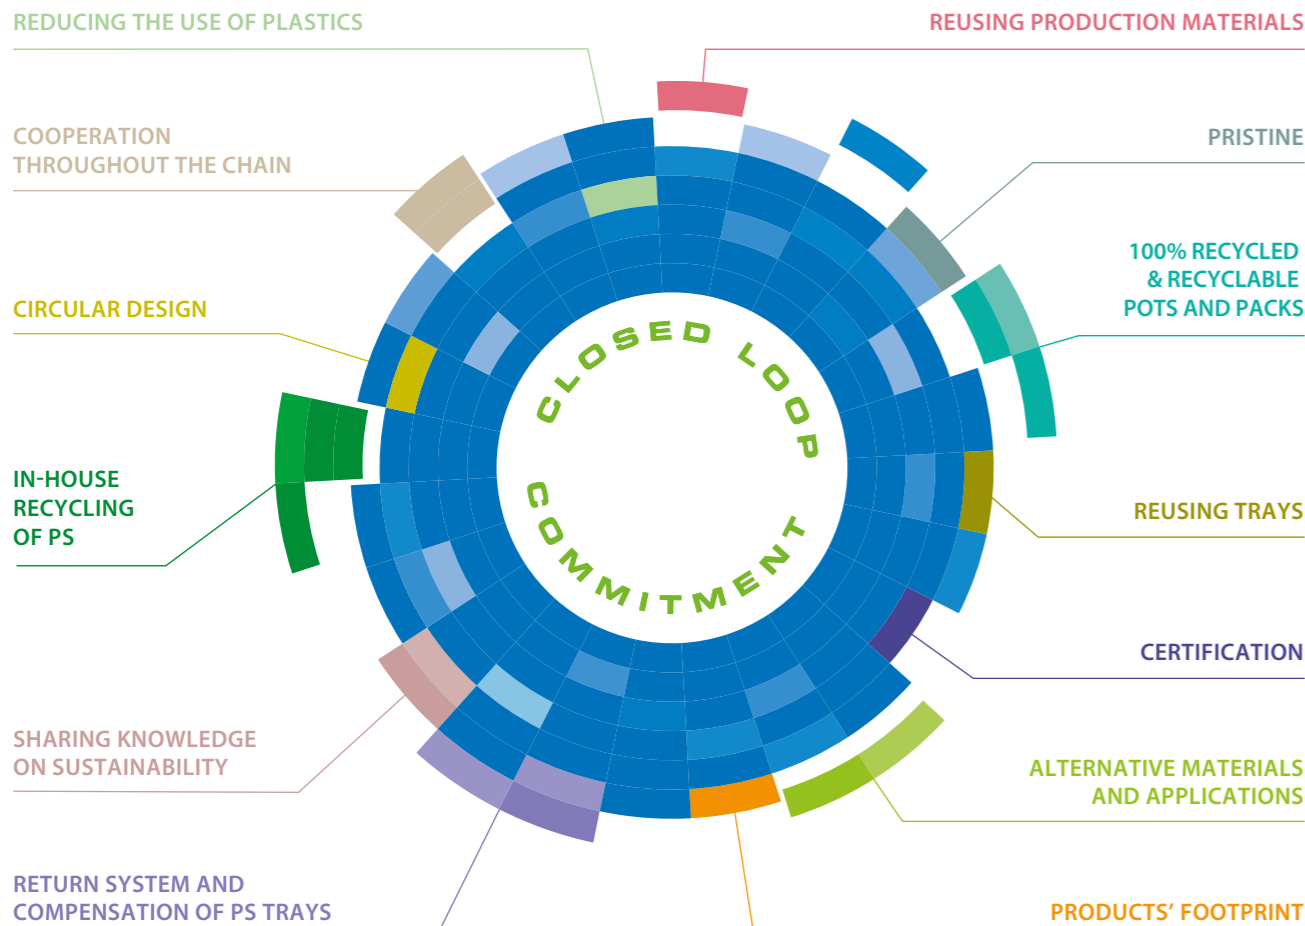

CLOSED LOOP COMMITMENT

Together we can close the material loop – that is our belief and our aim! Every little bit helps to make a big impact. Everyone can do their part! Through our Closed Loop Commitment, we know that we are helping to close the loop in every part of the chain. From creating smart designs to reducing material usage by developing lighter trays. And from performing life cycle analyses to conducting in-house recycling. And, of course, we let an independent institute assess whether our products really do help protect the environment. We are proud to display the Cyclos certificate on more and more pots and trays!

Want to help us close the material loop further? Yes, we can! Please contact Sales Support for more information.

'WE ARE COMPLETING THE CIRCLE WITH OUR CLOSED LOOP COMMITMENT'

COOPERATIONS

The only way to get ahead is to get ahead together. Modiform is taking the lead in our industry's sustainability developments and contributing not only to developments in horticulture, but at national and international level as well. Part of this is through our cooperation partnerships.

During the past year, we opened a new office at the World Horti Center and we have been cooperating with various participants in the field of Vertical Farming by taking part in the Σ-Grow pavilion. We have also committed to the

five sustainable goals for pots of the French horticulture organisation 'Valhor'. And there are more initiatives in the pipeline for the coming years! It is not just cooperation partners we like to work with. We are always pleased to be able to sit down with growers to work on smart new products.

'IMPROVING THE SUPPLY CHAIN TOGETHER'

PASS ON NATURE

ecoExpert of Modiform is a complete range of horticultural products made from recycled FSC cardboard, which after its use is completely naturally degradable. This enables growers to offer an alternative to plastic at the very beginning of the chain. Retailers can use ecoExpert products to respond to the ever-increasing consumer demand for environmentally friendly products.

Time for a sustainable addition

There is a growing awareness that we all need to contribute to a better environment. As a result, consumer demand for more sustainable products is increasing. Of course, it's important for both grower and retailer to meet this demand. With the ambition 'Horizon2025' Modiform takes the lead to change the whole industry in a sustainable way together with the entire chain. The aim is to supply products made from 100% recycled materials and to close the material loop. Modiform does this with, among others, the fully biodegradable ecoExpert products. The ecoExpert team is continuously working on the development of more sustainable products.

What are ecoExpert products?

The products offer the grower the possibility to provide both the retailer and the consumer with natural products. The natural look and feel of the products makes them extra attractive to the consumer. The ecoExpert product range contains a large number of trays and pots and is constantly expanded. These products make sure that the plants are properly protected at all times. In addition to the sustainable aspects, in the development Modiform has aimed at an optimal pallet and trolley load, a proper de-stacking, and firmness. All ecoExpert products are certified for recycling (Cyclos), they are food safe, and the cardboard comes from FSC certified sources.

Strong and water resistant: waste cardboard with biodegradable wax

The basis of the ecoExpert products is cardboard pulp. The cardboard fibres are longer than those of paper and therefore result into strong end products. Thanks to the addition of a natural wax, the products are water resistant. Furthermore, the wax is completely biodegradable.

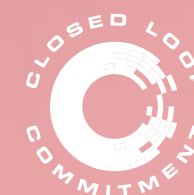

Recycled, recyclable, biodegradable and compostable.

The ecoExpert products are made from 100% recycled cardboard waste. This waste material is abundantly available, and its processing has minimal impact on the environment. After use, the products can be recycled through the normal paper waste system. ecoExpert products are biodegradable. If the products do end up in nature after they are used, they are not harmful to the environment or animals and, unlike plastic products, naturally degrade within a year. All ecoExpert pots can be planted in the ground with their contents, after which they naturally degrade. This not only provides convenience and less environmental impact, but it also prevents the plants from being damaged when consumers remove them from the pot. ecoExpert products can be composted both industrially or at home as well. All ecoExpert products are always friendly to the environment.

SUSTAINABLE PRODUCTS

When it comes to sustainability, making a difference is not complicated, and with products from Modiform, it is even straightforward! We make sustainable products the choice that makes sense for you. From a commercial perspective, these products are also commercially attractive for your business. You could call that a win-win!

You will see our sustainable ambitions reflected in each and every product in our range. We are replacing less sustainable products with better alternatives, adapting existing products, and constantly looking for ways to implement improvements. That could be standardisation for more efficient production and recycling or development of new products that are free from virgin plastic. Plus, we are always looking for alternative materials for plastic and new applications.

POTS

We cannot emphasise this enough: Modiform ensures that you automatically make the most sustainable and economically attractive choices. The PP-plastic used for pots is 100% recycled and can be offered for recycling with the regular household waste. Our R&R pots are certified by Cyclos. The Cyclos certificate shows that these pots are 100% recyclable.

TRANSPORT TRAYS

Sustainable production and use of transport trays is in Modiform's DNA for years. Modiform has an in-house recycling system to recycle used PS trays. By collecting trays and paying growers to put them out for collection, we can recycle PS trays at our own facility and use it to create new products. Standardisation and cooperation with partners also ensure sustainable use of materials. Normpack trays are a great example of standardisation in the horticulture sector. TrayC is a result of supply chain cooperation that closes the material loop. TrayC is a return system of trays which are made from 100% recycled PS, with no added dyes. Modiform has now set the standard for all transport trays on 100% recycled PS and launched this as Pristine®. Pristine means pure, unspoilt and it

means that the recycled material determines the colour of the Pristine trays. This is plastic in its purest form!

PROPAGATION

Automatic processing, good drainage and air circulation, optimal loading, and robust root growth: these are all things that our propagation trays offer. Our trusted ranges of tree trays, multi-trays, and paper plug trays are designed to optimise propagation. Of course, all of our trays are also a sustainable choice.

Multiple use

Did you know that it is possible to make propagation trays thicker, so that they can be used several times? Reuse ensures that less plastic is used overall. This is a great example of our Closed Loop Commitment!

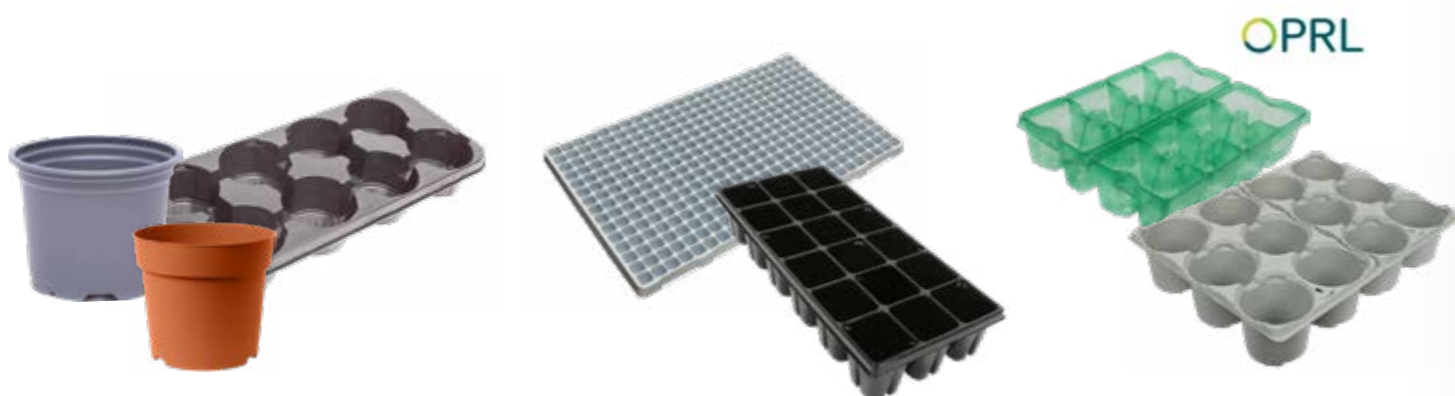

PACKS

For our packs, we prefer PS cool grey and PET transparent green as base materials, as both are made from Post-Consumer Recycled material (PCR) and are kerbside recyclable in many countries. The transparent green packs are made from 100% recycled green PET from consumer waste. These green packs are easily detectable in the waste treatment process, allowing us to close the material loop. Our cool grey packs are made from 100% recycled PS material from refrigerators, so no virgin material is used. How cool is that? Both the PS cool grey and the PET transparent green packs are Cyclos certified in certain countries.

Our PET transparent green packs are now OPRL certified (On-Pack recycling Label) for the United Kingdom as well. We aim to produce recyclable packs and help you to make the right and sustainable material choice! (see page 16)

'COOL AND TRANSPARENT'

 Check also page 16 [for more information about recycling](#)

ECO-EXPERT

The products in our ecoExpert range are made from 100% recycled FSC cardboard and are 100% naturally biodegradable after use. The products are water-resistant thanks to a natural wax, which is also completely biodegradable, and are strong thanks to the long fibres of the cardboard. Just like plastic pots, the new ecoExpert pots are suitable for automatic processing. The pots can be put in the ground with the plants, where they will naturally compost. The trays can be disposed of with waste paper. The ecoExpert range has grown considerably since its launch and now includes pots, trays, carriers, punnets, clampacks, and in-box trays.

Thanks to an exemption, many of our ecoExpert transport trays may be used at the auction – there are currently 12 trays with a settlement code. Ideal if you trade plants through the auction!

'AN ALTERNATIVE TO PLASTIC'

ecoExpert 

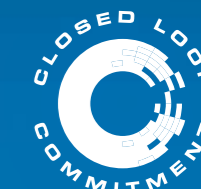

ONLINE PACKAGING

As the number of plants ordered online continues to grow, demand for safe, sustainable, and user-friendly solutions for shipment of pot plants is growing. With our new online packaging products, we are introducing a 100% recyclable and plastic-free shipment solution! Yet another sustainable choice that makes sense.

The product range consists of clampacks and in-box trays. These products are made from 100% recycled paper and cardboard from FSC-certified sources. They are made from the same raw materials as the cardboard boxes in which they are shipped. This ensures that online store orders can be shipped in a complete packaging concept made from cardboard. Once used, the cardboard can be disposed of with paper waste.

'A SUSTAINABLE AND OPTIMAL SOLUTION FOR SAFELY SHIPPING POT PLANTS'

RECYCLING

We have been recovering discarded products and creating new recyclable products from them since the 1980s. For more than three decades, we have been recycling used PS trays and production waste in our own recycling plant. We do everything we can to make it as easy as possible to recycle materials. We collect used PS trays from growers and thank them by giving them a competitive payment for their returns. This helps growers to play their part in closing the material loop.

'COMPETITIVE PAYMENT FOR RETURNED TRAYS'

RECYCLING TRAYS

When trays end up in household waste, they go unrecycled for all manner of reasons. Such a waste! We have been working hard with industrial partners to create return systems to allow these materials to be reused. It is vital that we create a return system to promote this recycling. Together with supply chain partners, we are doing just that. We are working with various parties throughout Europe to develop the best possible system for this. With one German partner, we have already developed the TrayC return system. Growers who supply to certain German DIY chains all use these trays, which are made from the uniform material PS (polystyrene). Modiform recycles the returned trays and uses them to

make new ones. Yet another great example of our Closed Loop Commitment, in which we live up to our promise to keep on closing the material loop!

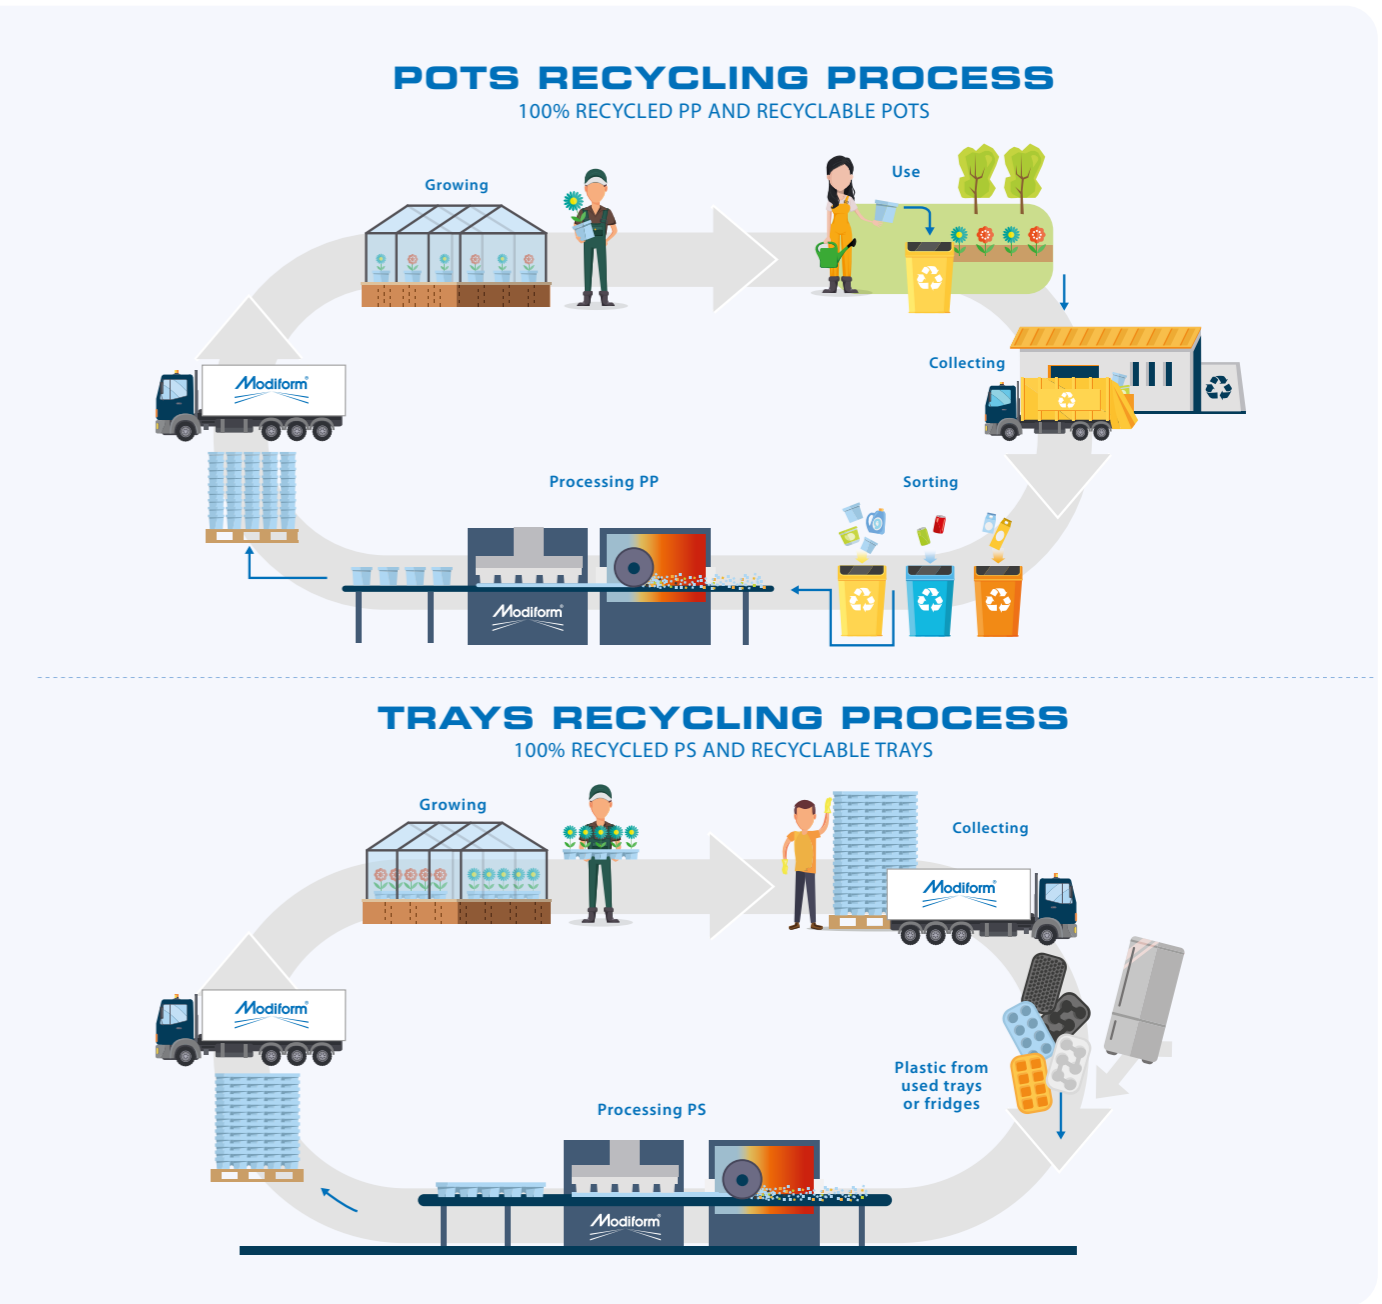

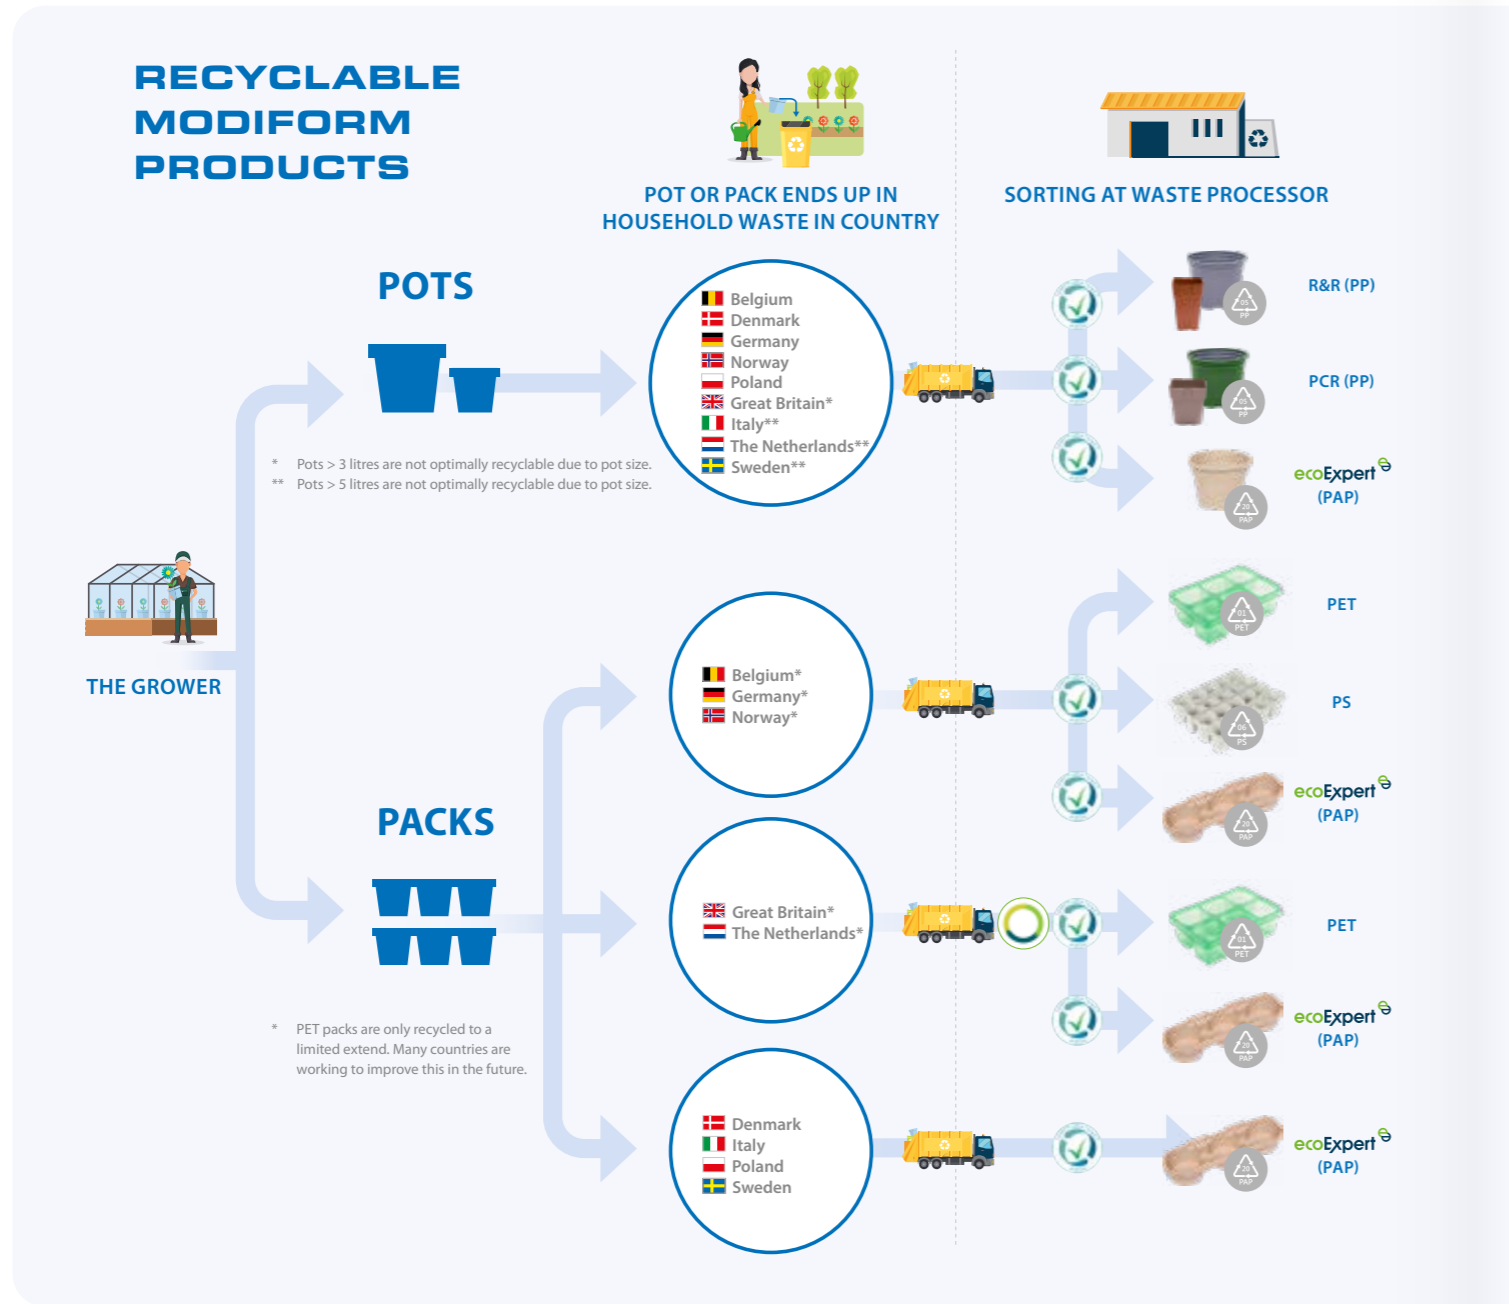

RECYCLING POTS AND PACKS

We are committed to recovering products from our supply chain and reusing these as well as developing sustainable solutions for pots and packs that end up in household waste. Our designs all take consumer waste streams into account. It is important that the pots and packs discarded through household waste systems are recyclable too. Our pots and packs used by consumers can be collected via the regular waste streams. We have developed the R&R and PCR pots and transparent green and cool grey pack

materials for simple recycling. It is easy for the consumer and, at a time when people are increasingly eager to demonstrate their commitment to sustainability, it is also good for business!

KNOWLEDGE SHARING

Plastics recycling varies from country to country. To know which plastics are recycled in which countries, we have produced a handy infographic. As a knowledge partner, we are always eager to share our knowledge and help the industry become more sustainable. The flowcharts for trays and pots show that there is a lot involved in their recycling. Select your sustainable pot or pack for your product's destination country.

CONCEPTS

FROM GOOD IDEA TO ATTRACTIVE CONCEPT

There is nothing we like more than to help you maintain and increase your sales volumes. And we do so in many different ways, together with our product developers and our consultants for marketing and recycling. Whether a unique print, a beautiful presentation, or customised products: create the perfect match between pot and tray and trigger your customers with a feast for the eyes. Prefer trendy colours or a sustainable look and feel? Want to join us for a brainstorming session?

SUSTAINABLE POTS

RECYCLED AND RECYCLABLE POTS (R&R)

Modiform is committed producing recyclable pots to close the material loop. Therefore our Recycled and Recyclable (R&R) pots are the new standard within our pot range. The base material of these pots is made from 100% recycled plastic (PP) and does not contain carbon black. So the pots are 100% recyclable. After using the pots, consumers can dispose of them with their waste. We can therefore definitively say that with this pot we have achieved the maximum in the reuse of plastic. And of course, all pots in this product line also come with Cyclos certificates to prove their recyclability.

Within this range, you can choose from the following colours:

- Thermoformed R&R main colours: royal grey, terracotta & white
- Thermoformed R&R standard colours
- Thomsen R&R main colours: mocha, anthracite, royal grey & terracotta
- Thomsen trend colours & standard colours

100% Post-Consumer Recycled (PCR) pots are available on request.

Please contact our Sales Support team for further advice on your order.

Did you know?

Modiform stopped selling unsustainable thermoformed pots in 2021, and in doing so closes the polypropylene (PP) material loop. These sustainable pots are recyclable, as the material used is recognised and separated when disposed of with household waste. With this, the company ensures that the raw materials are kept in the supply chain.

COLOURS THERMOFORMED POTS

From stylish grey to cheery yellow, our thermoformed coloured round and square pots can be ordered in as many as 14 standard colours. All pots can be delivered labelled, and the round pots can also be printed. All polypropylene (PP) plastic used is from recycled sources – no new PP material is added. By that we are closing the material loop for PP plastics.

If you want to make sure your products are attractively presented, please contact us. We are here to help!

INJECTION MOULDED POTS

IDEAL, HIGH-QUALITY POTS

The injection moulded pots have been produced since 1961. The range consists of around 80 different products. The PotContainer® with its wide brim has become a trendsetter. The pots have a high impact resistance and are easy to unstack. Their consistent quality ensures smooth automatic handling. The pots are available in stylish and contemporary colours and are colour fast.

COLOURS INJECTION MOULDED POTS

Presenting your fantastic products in beautifully coloured injection moulded pots is sure to entice customers! The latest colour trends according to the latest research are ready to brighten up every living room and garden. **See page 42** for more information on our trend colours. Our Thomsen pots are available in more than 120 colours, and you can choose from 16 colours in the standard range as shown below. These pots can be delivered labelled and printed to create an even more eye-catching presentation! The PP material of our R&R pots is 100% recycled. All pots are Cyclos certified, which guarantees their recyclability!

Sustainable is also beautiful! For more information, please feel free to contact Sales Support. We are here to help!

TREND COLOURS INJECTION MOULDED POTS

STYLE TRENDS OF 2024

We are happy to present you these 11 trend colours for 2024. Based on style trend research, we have developed these current and trendy coloured pots which will make your plant stand out even better!

We offer two different colour sets, namely Striking Colours and Natural Tones. Do you want to make sure that your plant pot combination stands out? Then choose one of the Striking Colours offered by Modiform. If you prefer something more neutral, choose a colour from the Natural Tones colour set.

All these pots meet our R&R standard, meaning that the PP material is 100% recycled and are fully recyclable. Ofcourse, all pots have a Cyclos certificate to prove their recyclability.

Go ahead and make your living room or garden fashionable with these fantastic colours!

PRINTING

STAND OUT WITH YOUR OWN BRAND

It is an eye-catcher, and it stimulates sales! Do you want to put a really eye-catching and distinctive product in stores? Then a printed pot is what you need! It is also an ideal way to comply with the plant passport requirements for the pot. By using our recyclable ink combined with a R&R pot, you can do your bit for the environment.

UNIQUE LOOK BOOSTS SALES

SHARP, ATTRACTIVE PRINT

EASILY RECOGNISABLE

LABELS

EYE-CATCHING AND INFORMATIVE

Combining the beautiful with the practical, a labelled pot stands out from the rest and immediately provides all the information you need: from bar codes to plant names and care tips. All of our round pots can be printed with a self-adhesive and moisture-resistant label. Labels can be printed in various sizes.

Make your pots stand out! Feel free to contact our Sales Support for more information about printing your pots. We are here to help!

FOR PLANT PASSPORT, BARCODES, PLANT NAMES, AND CARE TIPS

GOOD ADHESION AND MOISTURE-RESISTANT

AVAILABLE IN VARIOUS SIZES

EXCELLENT ADHESION

COLOURS TRAYS

The coloured trays combine aesthetics with sustainability. The standard colours match the colours of our pots and create a wonderfully eye-catching presentation. Almost all of our coloured trays are made from 100% recycled PS.

If you would like to know more about our colour range, visit our website or contact our Sales Support. We are here to help!

PRISTINE[®]

THE NEXT GENERATION TRAYS

Pristine means pure.

Pristine trays are trays without dye additives. This means that the recycled material determines the colour of the tray. This is plastic in its purest form! An easy way to make your business sustainable.

Pristine transport trays are going to be Modiform's standard. Would you like to have your propagation tray as a Pristine version as well? No problem! Please contact Sales Support for this.

No dye added

100% recycled polystyrene (PS)

Materials in their purest form

The recycled material used determines the colour

NOTES

TRANSPORT TRAYS

TRAYC: AUTOMATIC SUSTAINABLE BUSINESS IN A CIRCULAR SYSTEM

The returns system TrayC, which Modiform launched together with Landgard contains eleven trays. The TrayC trays do not contain virgin plastic or dye additives. The recycled material determines the colour of the trays. TrayC ensures that transport trays are kept within a circular system.

- 100% recycled polystyrene (PS)
- Suitable for multiple use
- Easy contribute to a circular system

NOTES

PACKS

Check also page 16 for more information about recycling

RECYCLABLE PACKS

RECYCLABLE PACKS MADE FROM 100% RECYCLED MATERIAL

Knowing that most of our packs end up at consumers' homes, we use recyclable plastics such as PS cool grey and PET transparent green as base material to produce packs.

- The cool grey packs are made from 100% recycled PS material from refrigerators (PCR)
- The green packs are made from 100% recycled green PET bottles (PCR)
- Cyclos certified in certain countries
- OPRL certified in the United Kingdom

Plastics recycling varies from country to country. To know which plastics are recycled in which countries, we have produced a handy infographic.

UNIQUE PROTECTION

RootBarrier

PREVENT ROOT-STICKING WITH ROOT BARRIER

Root Barrier is a unique and innovative protective layer for your plant's roots! Applying a protective layer to the tray reduces root sticking.

- Makes automated transplanting of larger plants possible
- Less damage and rejects by reduced root sticking
- Flexibility in the production process; plants can stay in the trays longer

Ground-breaking technology in horticulture

- Proven technology
- No effect on water quality (inert material)
- No residue in drain water
- Recyclable
- Can be applied to all types of Modiform trays

Root Barrier was developed in collaboration with LKP Plants and Van Tuijl and is only available from Modiform.
