PRODUCT CATALOGUE 2024 - 2026

INNOVATIVE COLLABORATION

As we all know, stagnation is really regression. The horticulture and retail sectors are constantly changing, and we all respond to the challenges by being flexible. Raw material prices fluctuate, and the costs of energy and labour also have an impact on our industry. As you have come to expect from Modiform, we maintain open and transparent communication about how these developments impact us. We continue to do everything we can to achieve the best results in collaboration with our entire ecosystem of customers and partners, focusing on new innovative developments and commercially interesting solutions, where possible together with our customers. That's what we will keep investing in. Because only if we can continue to work cost-effectively can we attain your and our sustainability goals. Goals that must and can be achieved, as far as we are concerned. Let's look ahead together!

SUSTAINABLE AS A MATTER OF COURSE

In Horizon2025, we outlined our sustainability ambitions. Now that it's almost 2025, we're of course looking beyond that. Under the name Horizon2028, the focus will continue to be on the goals we set before. We make sure our products have the smallest possible environmental footprint. We do this, for example, by looking very closely at the percentage of recyclate in products, but also by designing products and systems that can be reused. And by adapting to the use of other raw materials. Take our ecoExpert products that are made from cardboard pulp. There is no 'one size fits all'. No single solution that has the least amount of impact on the environment across the board. That's why we're always looking for the best solution for the situation in which a product is used. Every decision we make, every product we offer, contributes to our sustainability goals. We take the impact on the environment into account as much as possible, so you don't have to figure it out every time. That's what we call 'sustainable as a matter of course'!

FOCUS ON RANGE OF PRODUCTS

From transport trays to ecoExpert products. From online packaging to paper plug trays. In this catalogue, you'll find not only familiar and improved products, but also new items. No matter what product you look at, you can assume it's the most sustainable option. Take our injection moulded and thermoformed pots. They are all fully recyclable and made from recycled polypropylene. With our pots, you automatically meet retailer requirements and comply with laws and regulations. Our transport trays are Pristine trays, made from recycled material in its purest form. And you will also find detectable transport trays, made of light grey polystyrene. These are detected in the recycling stream and can therefore be reused. Our ecoExpert products are made from cardboard waste and the ecoExpert trays have a packaging code. That means they can also be used for plants that are traded at auction. The online packaging range has been improved: more in-box trays can now be placed on a pallet, and they are even better stackable! Modiform's packs are made from recycled materials. Did you know that Modiform offers the widest range of bedding packs and carrier packs? And that the retail packs guarantee fantastic shelf presentation? Modiform propagation trays come in all shapes and sizes, but we'd like to highlight the paper plug trays right off the bat. These were specially developed for good air circulation around the plug and good drainage of the cup. Everything for optimal root growth!

ON TO SUCCESS

We look forward to our continued collaboration with confidence and optimism, in which we will continue to communicate openly and honestly with each other. You can always count on our service and innovative solutions.

On behalf of the Modiform team,

Peter Linthorst
CFO/CEO Modiform

DISCLAIMER

The items shown in this catalogue are a selection from our range. For information on which items are available from stock, please contact Sales Support. We do our utmost to ensure that we have sufficient products in stock, and aim to deliver them as quickly as possible.

We use as much recycled material as possible for our products, as a result of which the colours may sometimes vary. The colours presented in the catalogue may differ from the actual colours.

MODIFORM

FOOTPRINT REDUCTION: FOR US AND FUTURE GENERATIONS

As a family business, we're more aware than anyone that we have to look carefully at what's good for us and for future generations. We must work together to keep our world liveable. We want and need to keep the focus on our responsibility. Ever since Modiform was founded in 1980, we have been using recycled materials. At the time, this was not yet the norm; we were already a forerunner in the field of sustainability. And we still are. Every day we take innovative steps to improve. Just think of our carbon black free R&R pots that are made from 100% recycled polypropylene and are 100% recyclable. And we don't add any dyes to our Pristine trays, which are made from 100% recycled polystyrene. And what about our Refined products? To get a realistic picture of the impact of products on the environment, we calculate the footprint per product. This helps us to make the right choices every time. This allows us to offer the most optimal solution for every product.

FOCUS ON FOOTPRINT

To get a realistic picture of the impact of products on the environment, we calculate the footprint per product. We make sure our products have the smallest possible environmental footprint. We do this, for example, by looking very closely at the percentage of recycle in products, but also by designing products and systems that can be reused. And by adapting to the use of other raw materials. This helps us make the right choices every time. As a result, we can offer the best solution for every product.

TOGETHER WE PREVENT WASTE

Modiform is constantly looking for collaboration – not only with our customers, but also with other partners. Because the only way we can achieve optimal results is by working together. As in nature, every step taken in our supply chain is related to the steps that others take. Will the recycling laws and regulations change? That would have consequences for everyone. We keep a close eye on all developments and translate them into how they impact your and our daily practice. Every detail counts. At every step we take, from the initial idea to the final product, we take into account both operational and sustainability optimisation. We do this internally, for example by further automation, but above all with a view to what works best for our customers.

We understand all too well that your company is not the same as another company. And that your wants or needs may be different. And that's exactly why we like to have a conversation, so we can find out exactly what requirements our products have to meet. That way, we can determine jointly what the best solution would be. After all, we make products as sustainable as possible, with as few raw materials as possible, while maintaining quality. And we do this by designing smartly. We want to investigate whether alternative materials or smarter designs are a better fit for your needs. Our Research & Development departments and our business development teams specialise in this. In close contact with our suppliers, we work together on sustainable material solutions. This helps us to prevent waste of materials and reduce energy usage. We're constantly working to lowering the impact on the environment. And the fact that we like to go a step further is only normal to us. For example, we take back used PS trays from our customers and offer a competitive fee. We recycle the returned trays in our own factory. This means we ensure a very compact closed loop. Doing nothing is not an option. If we want to guarantee liveability for our own future – not to mention for our children and grandchildren – we have to keep taking smart steps forward every day. Together we can create a better environment – we're sure of that!

'SUSTAINABLE DOESN'T AUTOMATICALLY MEAN EXPENSIVE!'

We will always invent and produce products that add value. For the environment, but also commercially. Both can be achieved! We're always looking for sustainable solutions for cultivation, transport and packaging systems. Much has already been done in recent years; there are numerous examples. We have everything in house, from granulate production to product recycling, which has enabled us to make our business operations more sustainable at a fast pace. Even if you don't do anything, you're doing your part by using Modiform's products!

SMARTER TOGETHER

How great is it to take good ideas and eventually turn them into tangible products? We like to work together to flesh out, develop, and test ideas. For as long as necessary until they work optimally. And then to share that kind of success with others. There are always sustainable solutions, so let's sit down together to talk about it. Contact our Sales Support for more information.

'NATURALLY SUSTAINABLE'

Doing nothing? That's not an option! Together, we're going for a future-proof industry.

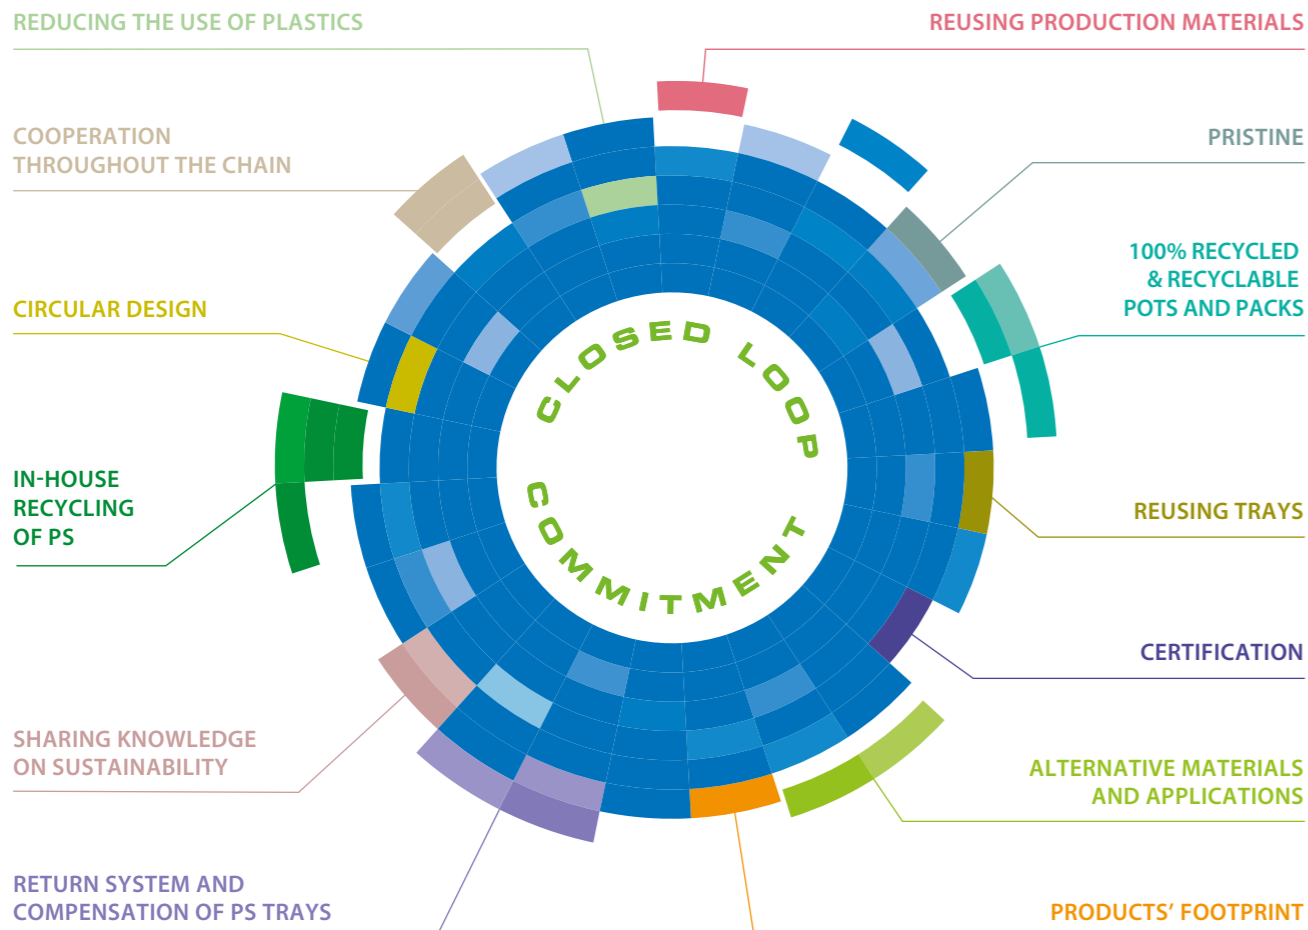

CLOSED LOOP COMMITMENT

Together we can close the material loop – that is our belief and our aim! Every little bit helps to make a big impact. Everyone can do their part! Through our Closed Loop Commitment, we know that we are helping to close the loop in every part of the chain. From creating smart designs to reducing material usage by developing lighter trays. And from performing life cycle analyses to conducting in-house recycling. And, of course, we let an independent institute assess whether our products really do help protect the environment. We are proud to display the Cyclos and OPRL certificates on more and more pots and trays!

Want to help us close the material loop further? Yes, we can! Please contact Sales Support for more information.

'WE ARE COMPLETING THE CIRCLE WITH OUR CLOSED LOOP COMMITMENT'

COOPERATIONS

The only way to get ahead is to get ahead together. Modiform is taking the lead in our industry's sustainability developments and contributing not only to developments in horticulture, but at national and international level as well. Part of this is through our cooperation partnerships.

During the past year, we opened a new office at the World Horti Center and we have been cooperating with various participants in the field of Vertical Farming by taking part in the Σ-Grow pavilion. We have also committed to the

five sustainable goals for pots of the French horticulture organisation 'Valhor'. And there are more initiatives in the pipeline for the coming years! It is not just cooperation partners we like to work with. We are always pleased to be able to sit down with growers to work on smart new products.

'IMPROVING THE SUPPLY CHAIN TOGETHER'

PASS ON NATURE

ecoExpert of Modiform is a complete range of horticultural products made from recycled cardboard, which after its use is completely naturally degradable. This enables growers to offer an alternative to plastic at the very beginning of the chain. Retailers can use ecoExpert products to respond to the ever-increasing consumer demand for environmentally friendly products.

Time for a sustainable addition

There is a growing awareness that we all need to contribute to a better environment. As a result, consumer demand for more sustainable products is increasing. Of course, it's important for both grower and retailer to meet this demand. With the ambition 'Horizon2025' Modiform takes the lead to change the whole industry in a sustainable way together with the entire chain. The aim is to supply products made from 100% recycled materials and to close the material loop. Modiform does this with, among others, the fully biodegradable ecoExpert products. The ecoExpert team is continuously working on the development of more sustainable products.

What are ecoExpert products?

The products offer the grower the possibility to provide both the retailer and the consumer with natural products. The natural look and feel of the products makes them extra attractive to the consumer. The ecoExpert product range contains a large number of trays and pots and is constantly expanded. These products make sure that the plants are properly protected at all times. In addition to the sustainable aspects, in the development Modiform has aimed at an optimal pallet and trolley load, a proper de-stacking, and firmness. All ecoExpert products are certified for recycling (Cyclos), and they are food safe.

Strong and water resistant: waste cardboard with biodegradable wax

The basis of the ecoExpert products is cardboard pulp. The cardboard fibres are longer than those of paper and therefore result into strong end products. Thanks to the addition of a natural wax, the products are water resistant. Furthermore, the wax is completely biodegradable.

Recycled, recyclable, biodegradable and compostable.

The ecoExpert products are made from 100% recycled cardboard waste. This waste material is abundantly available, and its processing has minimal impact on the environment. After use, the products can be recycled through the normal paper waste system. ecoExpert products are biodegradable. If the products do end up in nature after they are used, they are not harmful to the environment or animals and, unlike plastic products, naturally degrade within a year. All ecoExpert pots can be planted in the ground with their contents, after which they naturally degrade. This not only provides convenience and less environmental impact, but it also prevents the plants from being damaged when consumers remove them from the pot. ecoExpert products can be composted both industrially or at home as well. All ecoExpert products are always friendly to the environment.

SUSTAINABLE PRODUCTS

With Modiform's products, you're automatically contributing to sustainability. We translate our sustainability goals into each individual product. We are always looking for alternatives and constantly making improvements. Whether it's about developing new products, such as in our Refined-range, or smart designs that ensure that fewer transport movements are required. The pots are offered as standard in the trendiest colours, but of course specific colour requirements or PCR recipes are also possible on request. And to add extra value: the plant passport can be printed on a label on the pot. And how about your own logo? A printed pot attracts more attention. Interested in getting pots labelled? Then just use our labelling service!

Did you know that Modiform's paper plug trays are specially developed for good air circulation around the plug and good drainage of the cup? This promotes optimal root growth. In addition to the paper plug trays, Modiform can also combine cultivation trays with other sustainable growing media.

POTS

We cannot emphasise this enough: Modiform ensures that you automatically make the most sustainable and economically attractive choices. These pots are made of 100% recycled polypropylene and can be offered for recycling with the regular household waste. Our R&R pots are certified by Cyclos. The Cyclos certificate shows that these pots are 100% recyclable. Our R&R pots are now also OPRL (On-Pack Recycling Label) certified for the United Kingdom. Another step to close the material loop with our products.

TRANSPORT TRAYS

Sustainably produced trays, creating a return system to collect trays, in-house recycling, cooperation with partners and standardisation in the horticulture sector all ensure the sustainable use of materials and an efficient repurposing of recycled material. The Normpack tray is the answer to standardisation, and TrayC is an example of supply chain cooperation that closes the material loop. TrayC trays are made from 100% recycled PS, with no added dyes. The colour of the recycled material used in the product determines the colour of the tray! By collecting trays and paying growers to put them outside for collection, we can recycle PS at our own facilities and

use it to create new products. Pristine is the standard for Modiform transport trays. These trays are polystyrene trays without dye additives. The recycled material determines the colour of the tray. Plastic in its purest form! Next to Pristine, Modiform offers detectable transport trays: JustGrey is a light grey polystyrene which is NIR detectable and can therefore be sorted from mixed plastics. Our white and transparent PS are NIR detectable as well. PS JustGrey, white and transparent are all Cyclos certified.

PROPAGATION

Automatic processing, good drainage and air circulation, optimal loading, and robust root growth: these are all things that our propagation trays offer. Our trusted ranges of tree trays, multi-trays, and paper plug trays are designed to optimise propagation. And all of our trays are also a sustainable choice, of course.

Multiple use

Did you know that it is possible to make propagation trays thicker, so that they can be used several times? Reusing trays ensures that less plastic is used overall. This is a great example of our Closed Loop Commitment!

PACKS

For our packs, we aim for recyclable base materials to close the material loop. We use PS cool grey and PET transparent green as base materials, as both are highly recyclable. The transparent green packs are made from 100% recycled green PET from consumer waste. These green packs are easily detectable in the waste treatment process, allowing us to close the material loop. Our cool grey packs are made from 100% recycled PS material, partly from refrigerators, so no virgin material is used. How cool is that? Both the PS cool grey and the PET transparent green packs are Cyclos certified in certain countries.

Plastic recycling varies from country to country. To know which plastics are recycled in which countries, we have produced a handy infographic. Our PET transparent green packs are now OPRL certified (On-Pack Recycling Label) for the United Kingdom as well. We aim to only produce recyclable packs and help you to make the right and sustainable material choice!

 Check also page 16 for more information about recycling

ECO-EXPERT

The products in our ecoExpert range are made from 100% recycled cardboard and are 100% naturally biodegradable after use. The products are water-resistant thanks to a natural wax, which is also completely biodegradable, and are strong thanks to the long fibres of the cardboard. Just like plastic pots, the new ecoExpert pots are suitable for automatic processing.

The pots can be put in the ground with the plants, where they will naturally compost. The trays can be disposed of with waste paper. The ecoExpert range has grown considerably since its launch and now includes pots, trays, carriers, punnets, clampacks, and in-box trays. Thanks to an exemption, many of our ecoExpert transport trays may be used at the auction – there are currently 12 trays with a settlement code. Ideal if you trade plants through the auction!

'AN ALTERNATIVE TO PLASTIC'

ONLINE PACKAGING

As the number of plants ordered online continues to grow, demand for safe, sustainable, and user-friendly solutions for shipping pot plants is growing. With our new online packaging products, we are introducing a 100%

recyclable and plastic-free shipping solution! Yet another sustainable choice that makes sense.

The product range consists of clampacks and in-box trays. These products are made from 100% recycled cardboard. They are made from the same raw materials as the cardboard boxes in which they are shipped. This ensures that online store orders can be shipped in a complete packaging concept made from cardboard. Once used, the cardboard can be disposed of with paper waste.

With the upgraded versions of our in-box trays we get more on a pallet and the trays are much easier to de-stack. The new in-box trays are deeper and can be stacked on top of each other. Since this saves significant packing time, the in-box trays are a great opportunity for packers who make a sustainable material choice but also want efficient handling and a secure packaging solution for the plants.

'A SUSTAINABLE AND OPTIMAL SOLUTION FOR SAFELY SHIPPING POT PLANTS'

RECYCLING

We have been collecting discarded products and creating new recyclable products from them since the 1980s. For more than three decades, we have been recycling used PS trays and production waste in our own recycling plant. We do everything we can to make it as easy as possible to recycle materials. We collect used PS trays from growers and thank them by giving them a competitive payment for their returns. This helps growers to play their part in closing the material loop.

'COMPETITIVE PAYMENT FOR RETURNED TRAYS'

DIFFERENT WASTE STREAMS, DIFFERENT TREATMENT

When we look at the waste streams of our products, they are not all the same: some products end their life in a business environment (trays), while others end up at consumers' homes (pots and packs). Where waste streams

end up, determines how the waste is being treated. Not only are business and household waste streams treated differently, but the country in which products are being discarded can also determine whether a product will be recycled and how. Modiform closely tracks national and international developments and can advise you on the best sustainable solution for the products you use.

RECYCLING TRAYS

The majority of our trays end up in business waste. This is then sorted and can be recycled. At Modiform we buy our materials from these parties: recycled PS is the input for our products. Customers can also directly return used PS trays to Modiform so the closed loop becomes very direct. We have been working hard with industrial partners to create return systems to allow these materials to be reused directly. It is vital that we create a return system to promote this recycling. Together with supply chain partners, we are doing just that. We are working with various parties

throughout Europe to develop the best possible system for this. Modiform recycles the returned trays and uses them to make new ones. A great example of our Closed Loop Commitment. We are doing it already with our customers and would like to expand this further. So we encourage our customers to contact Modiform and inform about how you can return your used trays.

RECYCLING POTS AND PACKS

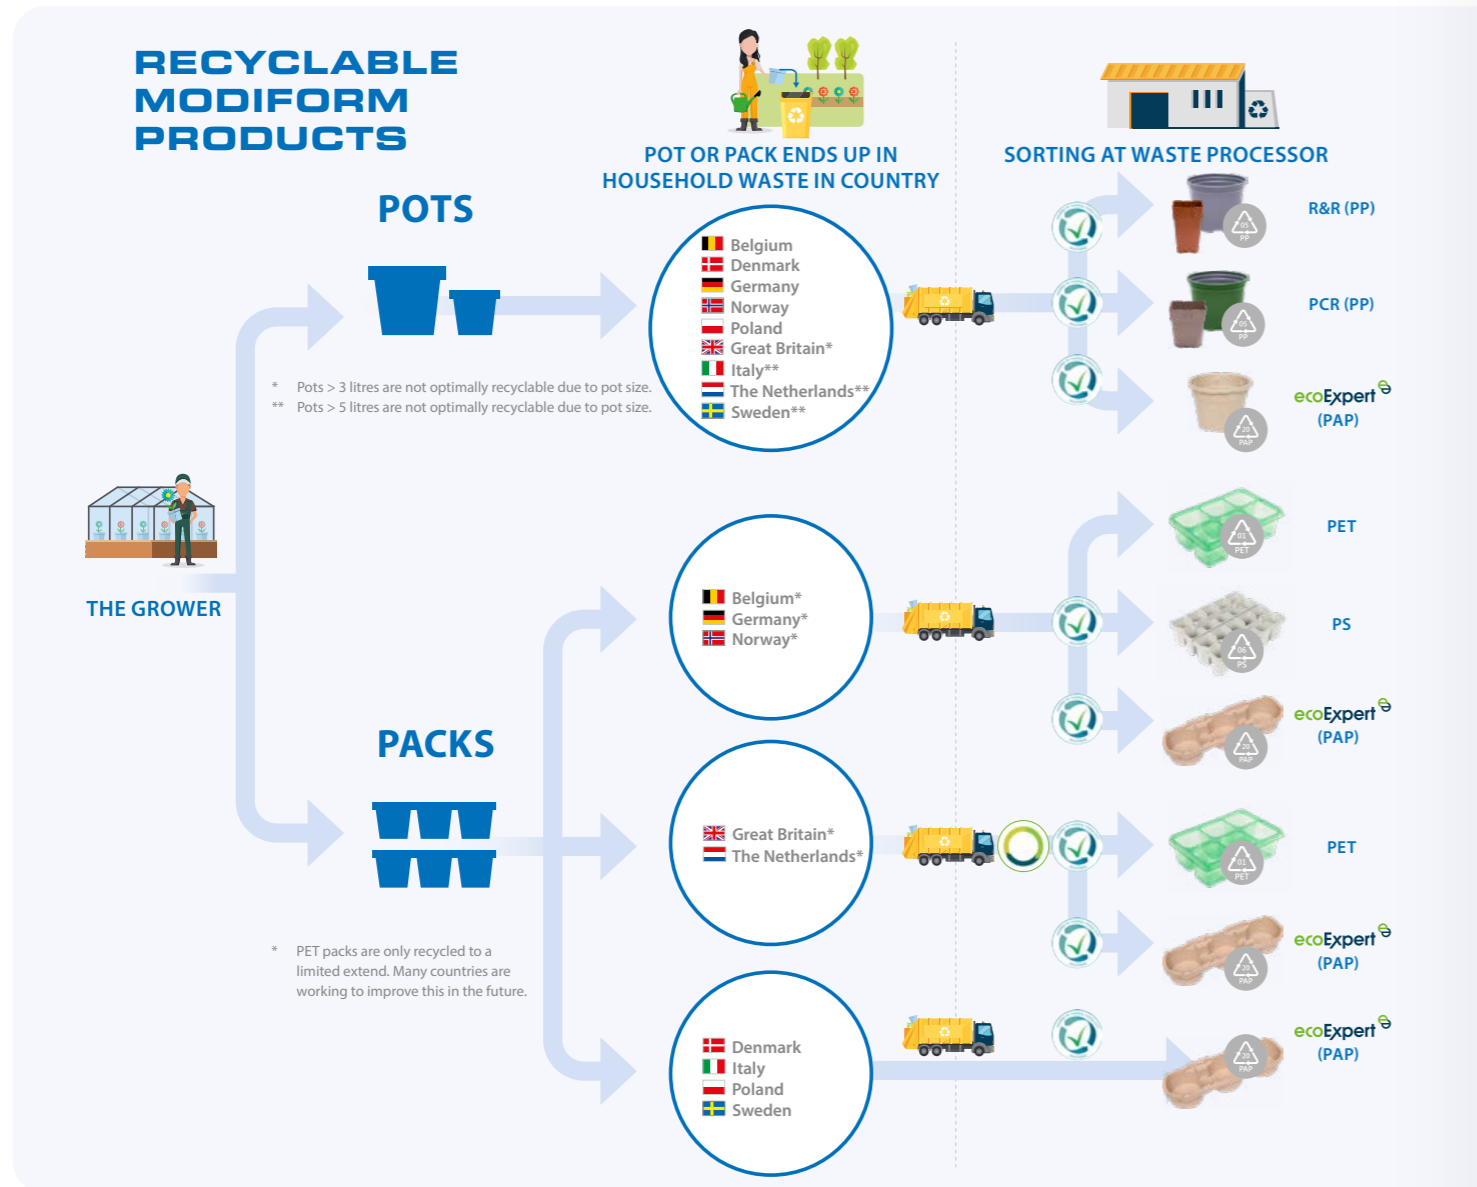

We are committed to recovering products from our supply chain and reusing these as well as developing sustainable solutions for pots and packs that end up in household waste. Our designs all take consumer waste streams into account. It is important that the pots and packs discarded through household waste systems are recyclable too. Our pots and packs used by consumers can be collected via the regular waste streams. We have developed the R&R without carbon black pots and transparent green and cool grey pack materials for simple recycling. It is easy

for the consumer and, at a time when people are increasingly eager to demonstrate their commitment to sustainability, it is also good for business!

Next to the range of plastic products, Modiform also sells ecoExpert products from recycled cardboard waste. These products can also be recycled of course. Both in business and household waste streams.

KNOWLEDGE SHARING

As mentioned, plastics recycling varies from country to country. To know which plastics are recycled in which countries, we have produced a handy infographic. As a knowledge partner, we are always eager to share our knowledge and help the industry become more sustainable. The flowcharts for trays and pots show that there is a lot involved in their recycling. Select your sustainable pot or pack for your product's destination country.

CONCEPTS

FROM GOOD IDEA TO ATTRACTIVE CONCEPT

There is nothing we like more than to help you maintain and increase your sales volumes. And we do so in many different ways, together with our product developers and our consultants for marketing and recycling. Whether a unique print, a beautiful presentation, or customised products: create the perfect match between pot and tray and trigger your customers with a feast for the eyes. Prefer trendy colours or a sustainable look and feel? Want to join us for a brainstorming session?

COLOURS THERMOFORMED POTS

From stylish grey to cheery yellow, our thermoformed coloured round and square pots can be ordered in as many as 13 standard colours. All pots can be delivered labelled, and the round pots can also be printed (**please see page 32**). All polypropylene (PP) plastic used is from recycled sources – no new PP material is added. By that we are closing the material loop for PP plastics. All pots are Cyclos and OPRL certified, which proves that they are optimally designed for recycling!

If you want to make sure your products are attractively presented, please contact us. We are here to help!

PRINTING & LABELLING THERMOFORMED POTS

STAND OUT WITH YOUR OWN BRAND

It is an eye-catcher, and it stimulates sales! Do you want to put a really eye-catching and distinctive product in stores? Then a printed pot is what you need! It is also an ideal way to comply with the plant passport requirements for the pot.

- UNIQUE LOOK BOOSTS SALES
- SHARP, ATTRACTIVE PRINT
- EASILY RECOGNISABLE

EYE-CATCHING AND INFORMATIVE

Combining the beautiful with the practical, a labelled pot stands out from the rest and immediately provides all the information you need: from bar codes to plant names and care tips. All of our round pots can be printed with a self-adhesive and moisture-resistant label. Labels can be printed in various sizes.

Make your pots stand out! Feel free to contact our Sales Support for more information about printing your pots. We are here to help!

COLOURS INJECTION MOULDED POTS

Presenting your fantastic products in beautifully coloured, injection moulded pots will certainly entice customers! Our Thomsen pots are available a wide range of colours, and you can choose from 16 colours in the standard range as shown below. All round pots can be delivered labelled and printed to create an even more eye-catching presentation! The PP material of our R&R pots is 100% recycled. All pots are Cyclos certified, which proves that they are optimally designed for recycling! On top of that, several colours are OPRL certified in the United Kingdom!

Sustainable is also beautiful! Please feel free to contact Sales Support for more information. We are here to help!

STANDARD COLOUR RANGE:

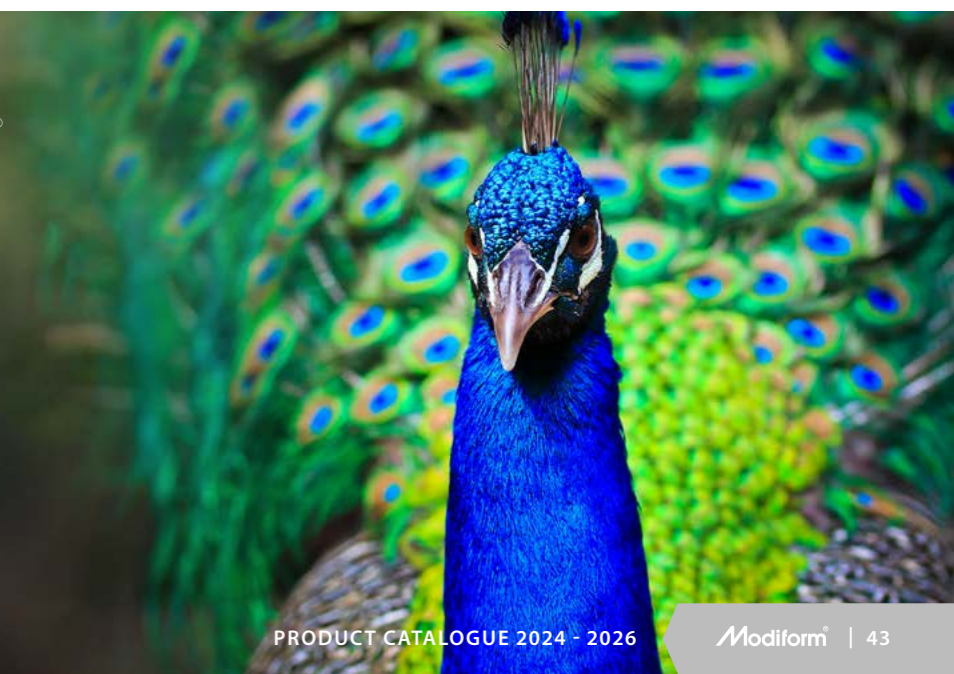

SPECIFIC PLANTS NEED SPECIFIC COLOURS

We give you the customer choice because each living room and every garden is different. That is why we present you our colour options for your pots. Have a colour in mind? Let's create it together! Contact us to bring your custom colour dreams to life!

THOMSEN®

PRINTING & LABELLING INJECTION MOULDED POTS

STAND OUT WITH YOUR OWN BRAND

It is an eye-catcher, and it stimulates sales! Do you want to put a really eye-catching and distinctive product in stores? Then a printed pot is what you need! It is also an ideal way to comply with the plant passport requirements for the pot.

- UNIQUE LOOK BOOSTS SALES
- SHARP, ATTRACTIVE PRINT
- EASILY RECOGNISABLE

EYE-CATCHING AND INFORMATIVE

Combining the beautiful with the practical, a labelled pot stands out from the rest and immediately provides all the information you need: from bar codes to plant names and care tips. All of our round pots can be printed with a self-adhesive and moisture-resistant label. Labels can be printed in various sizes.

Make your pots stand out! Feel free to contact our Sales Support for more information about printing your pots. We are here to help!

TRANSPORT TRAYS

GUARANTEED QUALITY FOR YOUR PLANTS
Extensive range of transport trays for pot sizes 4.5 cm to 25 cm for both round and square pots.

COLOURS TRAYS

The coloured trays combine aesthetics with sustainability. The standard colours match the colours of our pots and create a wonderfully eye-catching presentation. All of our coloured trays are made from 100% recycled PS.

If you would like to know more about our colour range, visit our website or contact our Sales Support. We are here to help!

PRISTINE

THE NEXT GENERATION TRAYS

Pristine means pure.

Pristine trays are trays without dye additives. This means that the recycled material determines the colour of the tray. This is plastic in its purest form! An easy way to make your business sustainable.

Pristine transport trays are going to be Modiform's standard. Would you like to have your propagation tray as a Pristine version as well? No problem! Please contact Sales Support for this.

No dye added

100% recycled polystyrene (PS)

Materials in their purest form

The recycled material used determines the colour

NOTES

TRANSPORT TRAYS

TRAYC: AUTOMATIC SUSTAINABLE BUSINESS IN A CIRCULAR SYSTEM

The returns system TrayC, which Modiform launched together with Landgard, contains a range of standardised transport trays. The TrayC trays do not contain virgin plastic or dye additives. The recycled material determines the colour of the trays. TrayC ensures that transport trays are kept within a circular system.

- 100% recycled polystyrene (PS)
- Suitable for multiple use
- Easy contribute to a circular system

PACKS

Check also page 16 for more information about recycling

RECYCLABLE PACKS

RECYCLABLE PACKS MADE FROM 100% RECYCLED MATERIAL

Knowing that most of our packs end up at consumers' homes, we use recyclable plastics such as PS cool grey and PET transparent green as base material to produce packs.

- The cool grey packs are made from 100% recycled PS material from refrigerators (PCR)
- The green packs are made from 100% recycled green PET bottles (PCR)
- Cyclos certified in certain countries
- OPRL certified in the United Kingdom

Plastics recycling varies from country to country. To know which plastics are recycled in which countries, we have produced a handy infographic.

UNIQUE PROTECTION

RootBarrier

PREVENT ROOT-STICKING WITH ROOT BARRIER

Root Barrier is a unique and innovative protective layer for your plant's roots! Applying a protective layer to the tray reduces root sticking.

- Makes automated transplanting of larger plants possible
- Less damage and rejects by reduced root sticking
- Flexibility in the production process; plants can stay in the trays longer

Ground-breaking technology in horticulture

- Proven technology
- No effect on water quality (inert material)
- No residue in drain water
- Recyclable
- Can be applied to all types of Modiform trays

Root Barrier was developed in collaboration with LKP Plants and Van Tuijl and is only available from Modiform.

OPTION TO SHIP PLANTS OF DIFFERENT HEIGHTS

100% RECYCLED FSC CARDBOARD AND RECYCLABLE (CYCLOS CERTIFIED)

EXCELLENT PROTECTION FOR PLANT AND POT

CAN BE SECURELY KEPT IN PLACE IN THE MATCHING SHIPPING BOX

Modiform offers with its online packaging sustainable and safe solutions to ship your plants. The product range consists of clampacks and in-box trays. Wow your customers with this 100% recyclable and plastic-free shipping solution!

ONLINE PACKAGING

ON THE ROAD
Safe and sustainable shipment of potted plants.

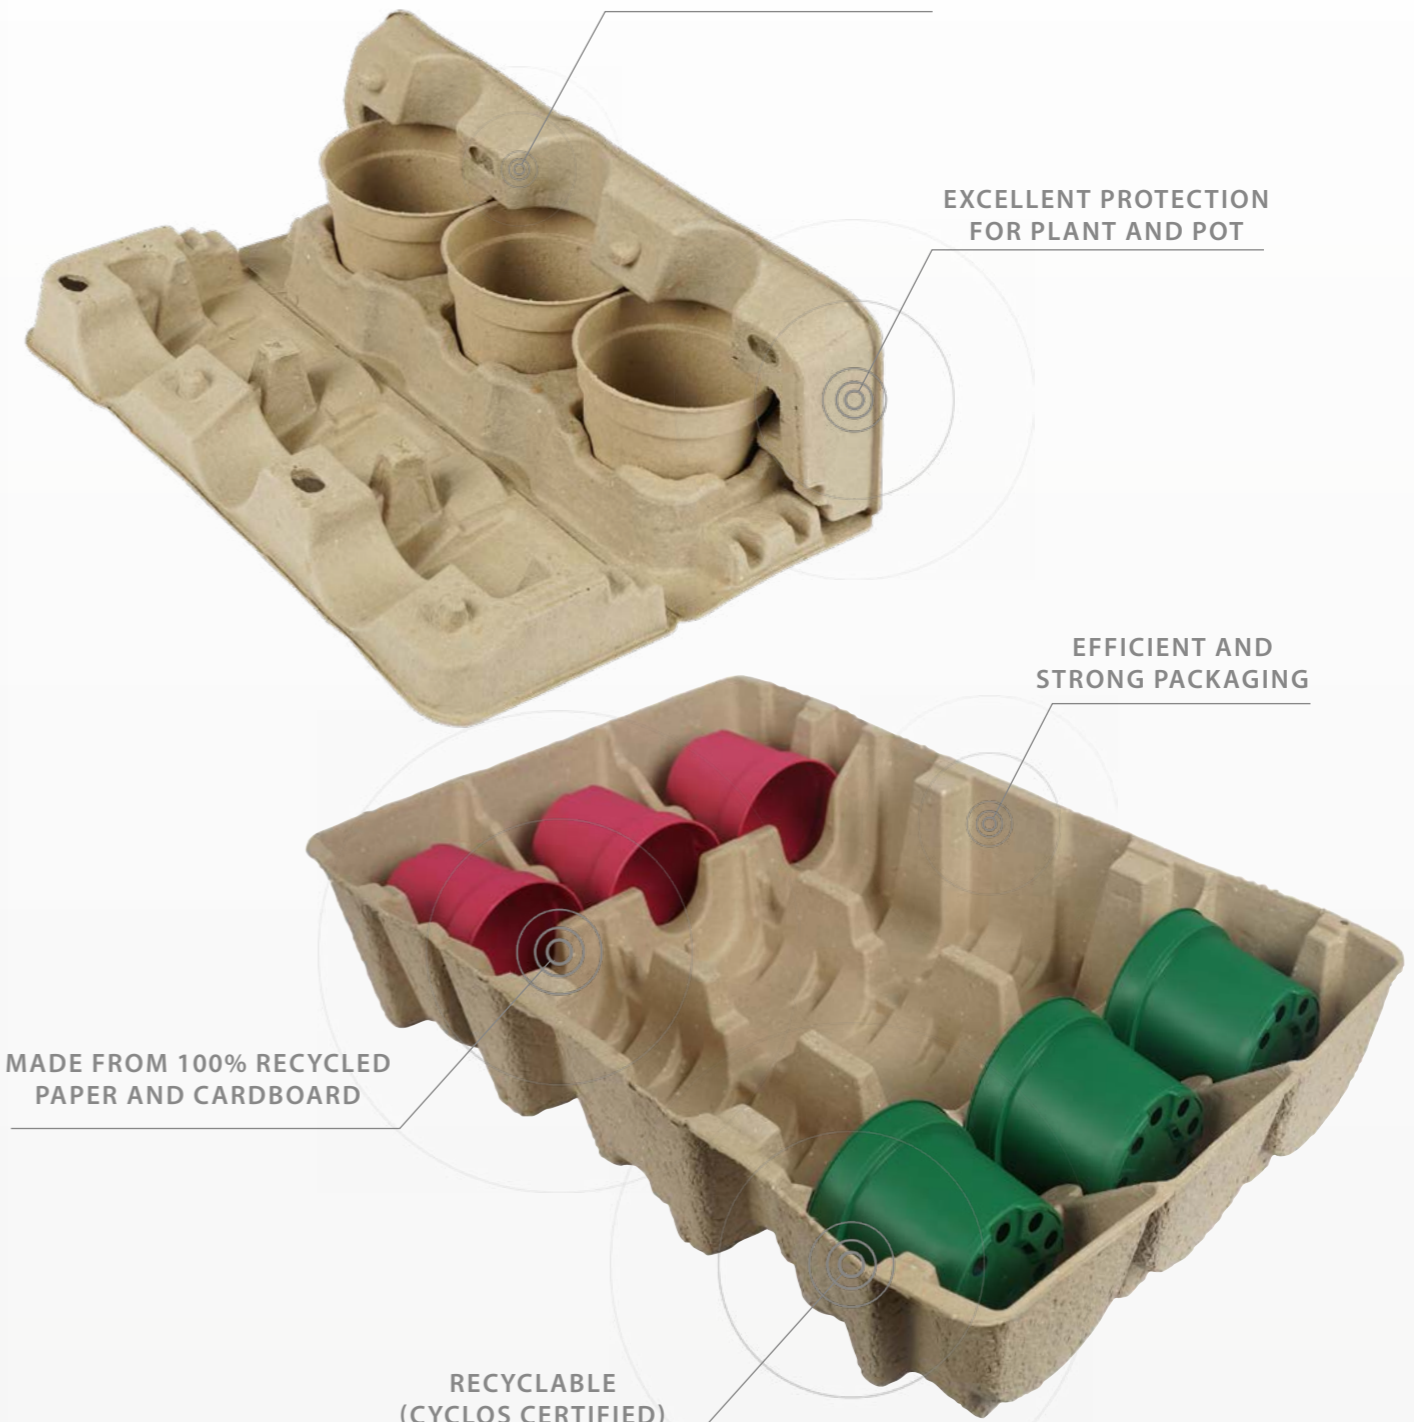

FAST AND EASY PACKING OF PLANTS

EXCELLENT PROTECTION FOR PLANT AND POT

EFFICIENT AND STRONG PACKAGING

MADE FROM 100% RECYCLED PAPER AND CARDBOARD

RECYCLABLE (CYCLOS CERTIFIED)

ONLINE PACKAGING

-  DELIVERY IN CONSULTATION
-  MEASUREMENTS
-  HEIGHT
-  NUMBER OF CELLS PER M²
-  WITH HOLES IN THE BASE
-  QUANTITY PER PALLET
-  QUANTITY PER BOX
-  QUANTITY PER DANISH SHELF
-  QUANTITY PER EURO SHELF
-  VOLUME
-  MATERIAL TYPE
-  SLOT FOR PLANT LABEL
-  CARRIER HANDLE HOLE
-  NUMBER OF CUPS PER TRAY
-  PUSH-OUT PLATE
-  COLOUR

CLAMPACKS

- Fast and efficient packing of plants
- Excellent protection for plant and pot
- Can be securely kept in place in the matching shipping box
- 100% recycled cardboard and recyclable (Cyclos certified)
- Option to ship plants of different heights
